

**AWE SUM
ORGANICS®**

Totally Organic Since 1985

Organic Apple Program

Awe Sum Organics Organic Apples are grown by San Clemente in Chile, ranging from Maule and La Araucanía region. Our grower is a regional pioneer in organic apple production committing to grow the highest quality, best tasting organic apples available in the world with favorable growing conditions and using cutting-edge technology to meet consumers' demand. Our fresh, seasonal imported organic apples from the Southern Hemisphere are available as "new crop" during the domestic off-peak season, offering a fresher alternative to storage apples and complimenting a year-round program.
