

# Organic Chilean Blueberry Program

Awe Sum Organics blueberries are bursting with sweet flavor and a hint of tartness your taste buds will love. These delicious and nutritious berries are grown in Region IX, the southern part of the Central Valley of Chile surrounded by volcanoes. The deep rich, volcanic and fertile soil together with the optimal climate are perfect for organic blueberry production. This area produces some of the most Awe Sum blueberries available at that time. Our Awe Sum Organic blueberries are 100% Duke variety.

The Duke variety retains fresh quality and are known for their mildly tart and delicious flavor. This variety has large berry size and is very firm.
