

# Organic Apple Program

Crisp and juicy, Awe Sum Organics apples are organically grown by BayLeaf in Hawkes Bay, New Zealand, Greenvic in Chile, and PAI in Argentina. These growers are regional pioneers in organic apple production and are committed to growing the highest quality, best tasting organic apples available in the world. Our fresh, seasonal imported organic apples from the Southern Hemisphere are available as "new crop" during the domestic off-peak season, offering a fresher alternative to storage apples.
