

ABATE FETEL PEAR PROGRAM

Sweet and juicy, the Abate Fétel has a delicate and distinct buttery flavor making it a favorite heirloom variety in Italy. With an unusually sleek shape, Abate Fétel's are great for promotions—they're beautiful on display and arrive before the start of the summer fruit season. These aromatic pears have a smooth skin that is often tinged with russet. Developed in France in 1866, they're named after the monk, Abbé Fétel, who first bred them.

AWE SUM ORGANICS' Abate Fétel pears are organically grown by PAI, the leading Argentinian exporter of organic tree fruit, and also the only biodynamic certified pear grower in the Southern hemisphere. These slender beauties come from the Rio Negro Valley, known worldwide for growing some of the best tasting pears.

Call your sales rep for more details and ask about our Fair for Life fair trade, sustainably certified pears.
